SUMMARY

Security Engineer with 5+ years securing enterprise-scale cloud infrastructure, application security, and SOC/SIEM operations across Fortune 500, FinTech, and critical infrastructure organizations. Expert in AWS, Kubernetes, Splunk, Terraform, and Python-driven security automation at scale. Proven track record building DevSecOps pipelines, SOAR playbooks, threat detection programs, and vulnerability management workflows under NIST CSF, PCI-DSS, SOC 2, and ISO 27001 frameworks. Deep expertise in IAM governance, container security, zero-trust architecture, privacy engineering, and incident response for globally distributed engineering teams.

WORK EXPERIENCE

Costco Wholesale | ***Security Engineering Consultant*** | Seattle, WA | *Nov 2025 – Present*

- **Architected enterprise Splunk SIEM with 40+ correlation rules and SOAR playbooks** — automating 80% of Tier-1 alert triage and reducing mean time to detect (MTTD) by 52% across 10,000+ endpoints
- **Deployed AWS Security Hub, GuardDuty, WAF, and Macie across 200+ production accounts** — blocking 1M+ malicious requests monthly and achieving CIS Benchmark compliance with 61% fewer critical misconfigurations
- **Built Terraform IaC security modules and policy-as-code guardrails** — enforcing encryption, IAM least privilege, and network segmentation with 100% compliance across all provisioned cloud infrastructure
- **Integrated GitHub Enterprise SAST, SCA, and secrets detection using Snyk, Semgrep, and GitGuardian across 150+ repositories** — remediating 94% of critical findings within SLA and blocking 100% of credential exposure
- **Automated Python-driven vulnerability scanning, triage, and compliance reporting workflows** — reducing critical CVE remediation from 30 days to under 7 days and saving 25+ hours per quarterly audit cycle

Amazon | ***Security Engineer, Cloud & Detection Engineering*** | Arlington, VA | *Jan 2025 – Oct 2025*

- **Engineered AWS-native detection pipelines using CloudTrail, Config, GuardDuty, and Lambda** — processing 1B+ events daily with 99.7% anomalous activity detection across multi-region production environments
- **Secured Kubernetes workloads at scale** — implementing Pod Security Standards, OPA Gatekeeper, Falco runtime monitoring, and RBAC hardening across 40+ production microservices
- **Automated CI/CD security pipeline stages using GitHub Actions** — embedding SAST, DAST, container scanning, and dependency review that blocked 72% more vulnerabilities pre-deployment with zero-downtime releases
- **Built Python/Boto3 security automation** — including IAM least-privilege analysis eliminating 340+ over-privileged roles, SOAR incident enrichment reducing analyst triage time by 60%, and threat hunting scripts identifying 3 unknown persistence mechanisms
- **Designed Prometheus and Grafana security observability dashboards** — tracking MTTD, MTTR, vulnerability SLAs, and compliance posture in real time for 12 cross-functional engineering teams

Axis Bank | ***Security Engineer, SOC & Enterprise Security*** | India | *Aug 2020 – Jul 2023*

- **Deployed Splunk SIEM ingesting 50M+ daily events** — with custom correlation rules for financial fraud, insider threat, privilege escalation, and credential abuse across 15 critical banking applications
- **Enforced PCI-DSS Level 1 and ISO 27001 compliance programs** — achieving zero audit exceptions across 3 consecutive annual QSA reviews and external penetration tests
- **Conducted threat hunting exercises using MITRE ATT&CK framework** — identifying 8 previously undetected persistence mechanisms in banking application servers

SKILLS

Cloud & Infrastructure: AWS (GuardDuty, Security Hub, WAF, Macie, CloudTrail, IAM, Lambda, KMS, Config, VPC, S3), Azure, GCP, Kubernetes, Docker, Terraform, Helm
SIEM & Detection: Splunk Enterprise Security, SOAR, Elastic SIEM, Falco, OPA Gatekeeper, Prometheus, Grafana, CrowdStrike, SentinelOne
AppSec & DevSecOps: SAST, DAST (OWASP ZAP, Burp Suite), SCA, GitHub Enterprise, CI/CD Security Gates, IaC Scanning, Secrets Management
IAM & Zero Trust: Okta, OAuth2/OIDC/SAML, AWS IAM/SCPs, RBAC, PAM, MFA, Identity Lifecycle Management, Endpoint Security
Scripting & Automation: Python, Go, Bash, PowerShell, Rust, SQL, REST APIs, Boto3
Frameworks & Compliance: NIST CSF, NIST 800-53, PCI-DSS, SOC 2, ISO 27001, HIPAA, GDPR/CCPA, NERC CIP, CIS Benchmarks, MITRE ATT&CK, OWASP Top 10

Relevant Skills: Incident Response, Threat Hunting, Vulnerability Management, Privacy Engineering, DLP, CSPM, Penetration Testing, Bug Bounty, AI/ML Security

EDUCATION

M.S., Cybersecurity & Information Assurance | University of Central Missouri, USA

B.Tech., Computer Science | DVR & DrHS MIC College of Technology, India

CERTIFICATIONS

AWS Certified Security - Specialty | CompTIA Security+ | CISA
